

ATOLLO CLOUD BACKUP

Our Backup Cloud solution is suitable for both professionals and companies of all sizes: all servers used are European, certified and GDPR compliant.

For a small monthly fee the Backup Cloud is a safe insurance against data loss caused by di Crypto viruses, Cyber attacks and hardware failures that can affect local backups and can have fatal repercussions or major economic losses. To prevent is better than to cure.

Cloud data is convenient and secure: you can access all your data at any time, which is encrypted to make sure no one else can read it except the rightful owner.

You can customize the solution according to your need: you can include PCs and servers, NAS and mobile devices, email with Office365, and you can use existing cloud spaces such as Dropbox, Google Drive, Amazon S3, OneDrive, Microsoft AZURE, AWS S3, and others on demand.
