ATOLLO CLOUD BACKUP

Backup VM

Starting from

6,90
€/Month

VM Backup service is an add-on service that complements another Backup plan.

Our VM-Ware and Hyper-V virtual machine backup solution protects against human error, natural occurrence, or Ransomware and Cryptolocker virus infections.

Our backup and "Anti-disaster" solution ensures you easy recovery of your virtual environment by recovering entire virtual machines or individual files.

Ambiente di lavoro protetto — Server — Macchine Virtuali — Postazioni PC — Copia nei datacenter Cloud — Backup in Cloud — Datacenter Cloud gestito dal software

Caratteristiche

Easy implementation:	You can activate the BackupVM solution in addition to your Basic Professional or Advanced subscription
Extensive file recovery:	You can recover and rebuild entire virtual machines or any version of individual files
Virtual Machine Migrations:	Migrating your virtual machines has never been easier with dedicated commands
Virtual machine recovery:	you can restore virtual machines at any specific time in the past
Multiple destinations:	Save your data in different cloud destinations such as Azure, Amazon S3, Google Cloud Storage and others, or locally (optional)
Encrypted and secure data:	data is encrypted with a 256-bit key that only you possess, to ensure maximum confidentiality
Backup:	Copy your data via vCenter or via a dedicated virtual machine even in the case of the single Esxi node
Special technical features	– VMware Changed Block Tracking – Supports Backup of ESCi Free Version
